

2021 Signet Responsible Sourcing Protocol (SRSP):

Section 10: The Environment and Sustainable Development Goals (SDGs)

Signet believes that responsible business is good business, without causing harm to people or the planet, and that this can only be achieved by working together, and in partnership with our suppliers. In March 2021, Signet joined the UN Global Compact, the world's largest corporate sustainability initiative, which reaffirms our existing commitments to the [Ten Principles of the UN Global Compact](#) and the [Sustainable Development Goals](#).

The jewelry industry is working together to measure our environmental impact and strategize programs to reduce our greenhouse gas emissions. In line with the Decade of Action, Signet and our industry partners launched ambitious programs to set targets to work towards the SDGs. This year the Responsible Jewellery Council's (RJC) launched The Roadmap to 2030 to coordinate collective action on realizing the SDGs in the jewelry industry. In addition, De Beers launched [Building Forever 2030 Goals](#). Signet launched its [2030 Corporate Sustainability Goals](#) in June 2021.

As the jewelry industry is working together to solve some of the world's most pressing challenges such as climate change, Signet will be collecting more information from our suppliers.

Signet understands that some companies will already be actively collecting climate and environmental data and are well advanced in these areas, while others may be just beginning the journey. We are collecting data on our supply chain through a separate Environmental and Social ("E&S") Report for an initial assessment and for informational purposes only. You will not be penalized for your responses. You can obtain a copy of the questions in the E&S Report at the [Signet Responsible Sourcing Toolkit](#).
